

SET THE VIBE

LED Lights

Turn the LEDs on or off, change colors, and set the brightness right from your phone.

1 · GET THE APP

Downloads **Allbest Home**
(iPhone & Android)

2 · WATCH THE HOW-TO

Quick video: changing
colors & brightness

HOW IT WORKS

- 1 Scan QR 1 with your phone camera and install the free **Allbest Home** app.
- 2 Make sure your phone's **Bluetooth is on**, then open the app.
- 3 The app finds the LED controller automatically — tap to connect.
- 4 Use the app to switch the lights **on/off**, pick any **color**, or slide the **brightness**.

GOOD TO KNOW

The same QR is on the controller itself

The small white LED controller box on the wall has this same download QR printed on it. Please leave it plugged in — if the lights stop responding, unplug it for 5 seconds and plug it back in.
